

WATER NIGHT

Link to the website: <https://waternight.com.au/>

Sometimes we don't realise just how much water we use! Sometimes we even automatically turn the tap on not realising just how much water is going down the drain!

OUR CHALLENGE

On Thursday 22nd of October put a 9-10 litre bucket of water beside your sink! Then, use only that bucket all through the night! (5pm to 5am)

Decorate (paint, colour, your choice!) your bucket and take a photo of you with your bucket and bring the photo to school! Write a comment explaining how the challenge has changed your water usage habits.

Our tips:

- Put some cloths or tea towels over your taps so you don't automatically turn them on
- Take some bottles and fill them from the water in the bucket and put them in your fridge so they are cool for the night.
